

Society for Risk Analysis (SRA) Professional Workshop

Sunday December 4th, 2022 (1-5 pm) in Tampa, FL

Workshop 6: Risk Analysis Quality Test (RAQT) & Applications to Improve Risk Analyses & Risk Management Decisions

SPONSOR: SRA Applied Risk Management Specialty Group (ARM SG)

Consider these questions:

- Are you confident that technical risk analysis you conduct informs risk management decisions as you believe it ought to?
- Are you confident you know what changes could most improve your risk analysis practices and how to demonstrate the value of those changes?
- Do you feel it is acceptable for people to suffer harm due to ineffective or biased risk assessment with insufficient communications about quality of analysis to risk managers and the public?

If you answer “no” to any of these questions, then this workshop is for you!

The workshop offers:

- An overview of the purpose for, development of, and the questions comprising the Risk Analysis Quality Test (RAQT);
- Prototypical example applications of the RAQT to microbial risk assessments; and
- Group discussions of challenges and opportunities in applying the RAQT.

You will acquire:

- An overall understanding of SRA’s Risk Analysis Quality Test (RAQT)
- Ideas for how you can use the RAQT to evaluate:
 - your own work;
 - planning for a future risk analysis project; and
 - areas for improvement in past projects or ongoing processes.

FEES: **\$225** regular SRA members & non-members; **\$35 students**

ADVANCE REGISTRATION <https://www.sra.org/events-webinars/annual-meeting/>
